

Ahmed Elsaid AbdElftah Ahmed

Back-End Engineer | .Net Developer

ahmedwebdevelop2@gmail.com • 01095180053 • Egypt

[LinkedIn](#) • [GitHub](#)

Professional Summary

Detail-oriented .NET Backend Engineer specializing in designing and building scalable, high-performance web applications using C#, ASP.NET Core, and SQL Server. Proficient in implementing Clean Architecture, SOLID principles, and design patterns to deliver clean, maintainable, and testable code. Dedicated to integrating secure APIs, payment gateways, and real-time features to deliver efficient software solutions.

Education

Bachelor of Information Technology at Faculty of Computers and September 2020 - September 2024 Informations, Kafr Elshikh, Egypt

Activities: IEEE Computer Society – Student Member (2022 – 2023) Participated in coding competitions and workshops. Explored software engineering best practices and emerging technologies

Experience

[Internship]Back-End Engineer at Code Alpha, Remote June 2026 - Present

- Developed and deployed production-ready backend services and RESTful APIs within an agile, fast-paced internship environment.
- Built efficient data-driven solutions—including a Url Shortener Service—utilizing ASP.NET Core, Entity Framework Core, and SQL Server.
- Applied Clean Architecture principles and repository patterns to ensure a high level of code maintainability and separation of concerns.
- Utilized Git and GitHub for rigorous version control, code reviews, and seamless team collaboration.

[Trainee]Back-End Engineer(.Net Developer) at Eraa Soft, Remote September 2025 - May 2026 • Engineered scalable backend systems and RESTful APIs using ASP.NET Core, C#, and SQL Server.

- Implemented advanced features including secure payment gateways (Stripe), real-time communication via SignalR, and robust role-based authorization.
- Architected applications using Clean Architecture principles, ensuring strict separation of concerns and maintainable core business logic.
- Developed modular MVC and API components utilizing Areas to cleanly isolate Admin, Customer, and Identity functionalities.
- Applied SOLID principles and design patterns to ensure the delivery of clean, reusable, and testable code.
- Optimized database operations and data access layers using Entity Framework Core with Code-First migrations.

IT Intern at Egyptian Electricity Company, Alexandria, Egypt August 2023 - September 2023

- Exposure to database administration concepts and basic network/IT operations & Assisted in documenting small procedures and checking data integrity.
-

Professional Skills

Programming Languages: C# and JS

Object-Oriented & Design: OOP , SOLID Principles , Design Patterns and Clean Architecture

Web Technologies & Tech Stack: ASP.NET Core MVC, ASP.NET Core Web API (RESTful), SignalR, HTML5, CSS3, Bootstrap

Database Design & ORM: EERD ,SQL Server ,Entity Framework Core ,LINQ ,Database Design

Tools & Platforms: Git ,GitHub ,Visual Studio ,Visual Studio Code ,Scalar ,Postman ,Swagger

Soft Skills: Problem Solving, Analytical Thinking, Teamwork, Communication Skills, Task Prioritization, Adaptability

Projects

Shatbly (Service Booking Platform) • [GitHub](#) March 2026 - Present

A full-stack web platform connecting clients with maintenance technicians via live tracking and chat.

- Key Achievements: Implemented dual-user workflows (browsing, real-time chat via SignalR, and wallet systems) with secure RBAC and OTP authentication.
- Architecture: Structured using ASP.NET Core MVC Areas, Repository, and Unit of Work patterns.
- Tech Stack: C#, ASP.NET Core MVC, SQL Server, EF Core, SignalR, Identity.

Job Board Platform • [GitHub](#) April 2026 - Present

A high-performance RESTful API streamlining multi-role recruitment pipelines.

- Key Achievements: Engineered an optimized querying engine (server-side pagination, multi-filtering) and secured authentication via JWT with Refresh Token Rotation (HttpOnly cookies).
- Architecture: Built using a 3-tier Clean Architecture and Generic Repository pattern with Global Exception Middleware.
- Tech Stack: C#, Web API, SQL Server, EF Core, Fluent API, JWT Bearer, SOLID.

E-Commerce (API) • [GitHub](#) March 2026 - April 2026

A scalable, production-ready RESTful API handling e-commerce workflows and secure transactions.

- Key Achievements: Integrated Stripe API for payment gateways/webhooks and followed industry standards for secure endpoints with Scalar documentation.
- Architecture: Applied Clean Architecture principles, utilizing specialized service layers, Repository Pattern, and DTOs.
- Tech Stack: C#, Web API, SQL Server, EF Core, Stripe API, Scalar, DTOs.

E-Commerce (MVC) • [GitHub](#) December 2025 - February 2026

A full-stack web application featuring a complete online shopping experience and an advanced administration dashboard.

- Key Achievements: Integrated secure payments via Stripe API and implemented real-time chat functionality using SignalR alongside multi-role dashboard features.
- Architecture: Structured using Layered Architecture and ASP.NET Core Areas (Admin, Customer, Identity) for high modularity.
- Tech Stack: C#, ASP.NET Core MVC, SQL Server, EF Core, Stripe API, SignalR, Identity.

Other Projects • [CinemaTicketBooking](#) • [EventRegistrationSystem](#) • [UrlShortenerService](#)

- Cinema Ticket Booking
 - Event Registration System
 - Url Shortener Service
-

Languages

Arabic - Native

English - Conversational

Certificates

Back-end .NET from Eraa Soft • [Link](#) May 2026

Intensive training covering OOP, SOLID principles, SQL Server, and building secure RESTful APIs and MVC using ASP.NET Core and Clean Architecture.
